**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

***In the abstract of the disclosure:***

Replace the current abstract with the following new abstract attached hereto on a separate sheet.

***Explanation for Examiner's Amendment***

3. The abstract of the disclosure has been amended to delete legal phraseology and to reduce its length.

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Stephen F. Gerrity** whose telephone number is (703) 308-1279. The examiner can normally be reached on **Monday - Friday** from 5:30 - 2:00.

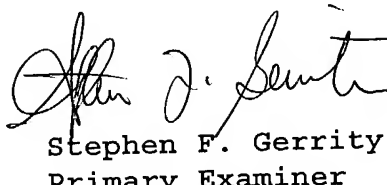

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Rinaldi Rada**, whose telephone number is (703) 308-2187, may be contacted.

Art Unit: 3721

ABSTRACT OF THE DISCLOSURE

A method and apparatus for wrapping loads of goods and materials in a wrapping material such as a plastics film, including placing at least two battens in a spaced substantially parallel orientation on one surface of the load using a pick and place unit, partially wrapping the load with the wrapping material by rotating the load relative to a dispenser for the wrapping material and/or rotating the dispenser around the load, at a first wrapping station, to envelop the battens in the wrapping material and to hold the battens in place on the surface of the load, the battens being spaced apart to support the load and being adapted to receive therebetween the forks of a fork-lift truck for transporting the load. Preferably, the wrapping material overlaps the ends of the battens to hold the battens in position. The load is then turned through about 90° from the first wrapping station to a second wrapping station where the wrapping is completed.
